Open-Ended Responses: Grades 9 - 12 SUNAPEE SCHOOL DISTRICT

Some students are using social media tools, videos, and online games outside of school to explore or teach themselves about academic or school topics that interest them. How are you using technology outside of school to learn new things or skills? Tell us what you are learning about and the types of digital tools or resources that you are using.

Response

SUNAPEE MIDDLE HIGH SCHOOL

To communicate with other students about assignments, and to help clear my confusion on certain assignments

SUNAPEE SR. HIGH SCHOOL

The only class wherein I use technology to supplement my learning on my own time (outside of typing a paper) is APUSH. I watch YouTube videos reviewing the content of chapters in my textbook.

I'm not

I use videos and online games to learn new things about science.

I definitely research and google things on a daily basis that I am briefly introduced to in school.

Pick a school subject and tell us how using technology in that class could make that subject more interesting for you. Some things to think about for your response: what type of class would it be, what type of technology would you like to use, and how would that technology help you learn more.

Response

SUNAPEE MIDDLE HIGH SCHOOL

Biology, teacher taught class, tablets, be able to research when confused

SUNAPEE SR. HIGH SCHOOL

In French, it would be nice to be able to Skype or Facetime with a "pen pal" of sorts.

French. We could use Google translate to help us look and understand things.

I think using more technology in music class would make it more interesting for me. We could use personal devices (ipods and phones) and the Chromebooks to look at online videos or games about music.

My music class would be more interesting if we had a full on recording studio and better equipment.
