

## **INCOME FROM SCHOOL SHOP SALES AND SERVICE**

The services and products provided through the district's various needed programs are not designed to be competitive with local businesses, not to produce revenue for the district. However, when such services and products are made available to the public, the customer will be charged an amount sufficient to cover costs of materials, supplies, parts used and insurance. Charges, except for materials and parts, will be waived for students enrolled in the course.

Money received from customers will be turned in to the school business office and credited to the general account.
