

EMERGENCY CARE AND FIRST AID

All District personnel have responsibilities in connection with injuries and emergencies occurring in school and at school-sponsored events, which may be classified as follows: (1) administering first aid; (2) summoning medical assistance; (3) notifying administration; (4) notifying parents; and (5) filing accident/injury reports.

District personnel must use reasonable judgment in handling injuries and emergencies. Caution should be exercised not to minimize or maximize any injury or illness. All personnel will be trained in the proper steps to be taken in the event of an injury or emergency.

The Superintendent will ensure that at least one other person on staff in each building, in addition to the school nurse, has current first aid and cardiopulmonary certification (CPR). If the school nurse or licensed practical nurse is not available, the person(s) who have current first aid and CPR certification is authorized to administer first aid and CPR as needed.

At the start of each school year, the school will obtain emergency contact information from parents or legal guardian for each student and staff member.

The school nurse or specially trained staff members shall assist in the treatment of injuries or emergency situations. Such individuals have the authority to administer oxygen in case of a medical emergency, if available and if appropriate. This authorization extends to administering oxygen to students without prior notification to parents/guardians.

Additionally, the school nurse or specially trained staff members may also administer epinephrine to any student in case of a medical emergency, if appropriate. This authorization extends to administering epinephrine without prior notification to parents/guardians.

Naloxone/Narcan and Opioid Antagonists:

The Board authorizes the District to obtain, store and administer naloxone/Narcan and/or other opioid antagonists for emergency use in schools.

The school nurse or other properly trained staff member may administer such medication in emergency situations. Opioid antagonists will be available during the regularly scheduled school day. They may be available at other times or events outside of the school day

The Superintendent is authorized to procure such medication on behalf of the District.

All such medication will be clearly marked and stored in the school nurse's office or other appropriate location. The school nurse is responsible for storing the medication consistent with the manufacturer's instructions.

Local law enforcement and emergency medical service personnel will be notified if such medication is administered by the District.

Records related to the administration of such medication shall be made and maintained by the school nurse. The school nurse will follow other first aid reporting protocols, as established in this policy

For all injuries requiring medical attention from District personnel, the staff person witnessing the event must fill out an accident report which must be submitted to the building administrator so that he/she is informed and a basis is established for the proper processing of insurance claims and remediation if necessary.

The District makes it possible for parents to subscribe to student accident insurance at low rates. This program is offered each year during September. The District does not provide student accident insurance.
